Bucket on Head

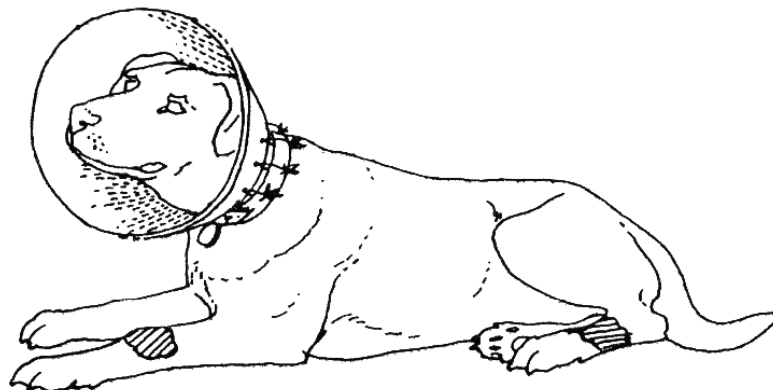

When the vet has treated your dog or cat they do not want the animal to undo all of their handy work! One effective method of preventing this is 'a bucket on the head'.

Instructions

1. Choose a bucket or container where the base will fit over the cat or dogs head.
2. Remove the base of the bucket or container leaving a small lip
3. On this lip punch holes at even space all the way around
4. Lace string through these holes and then around the cat or dogs collar attaching the bucket to the collar.
5. Put the bucket over the dog or cats head and secure the collar so it won't be pulled off over the animals head. The collar is there to hold the bucket in place.

THIS MAY LOOK COMICAL BUT DON'T REMOVE IT JUST BECAUSE YOUR FRIENDS LAUGH, AS IT IS VERY EFFECTIVE.

You will need to remove the bucket at meal times but make sure you replace it straight after.
