Pet Insurance

Pet insurance has become more accessible and popular in recent times. It can help you provide your pet with optimal care and lessen the financial concerns that may be associated with illness or injury to your pet. It may also mean you can proceed with more advanced treatments or specialist consultations for a complicated illness or injury which may not otherwise be affordable.

Both accident and illness can be covered and some companies also provide cover for routine health care such as vaccinations and de-sexing. As with other insurances there is a range of levels and options offered by companies. Cover against both accident and illness is advisable and the product disclosure statement should always be reviewed to ensure the policy is right for you and your pet.

If you have any further questions please make an appointment with your Veterinarian or ask one of our friendly staff members.
